

Additional Tips to Ensure You are Masking Properly:

Do NOT wear two medical masks. They are not designed to be tightly fitting and a second one does not improve fit.

To improve the fit of a medical mask, try knotting the ties at a spot near the mask, and tucking any extra mask material in. [Click here](#) for a great video that shows this process.

Use a mask that has ties. One tie should be secured at the middle of your head and the other at the base of your head.

Use a KN95 as a regular mask. Do not wear anything under or over these masks.

Use mask head gear or an 'ear saver' that has buttons or other methods to secure the mask.

Use a mask fitter.
