

Authorized Visitor Designation

Although vaccination rates among those 12 years of age and older are increasing, children under 12 are not yet candidates for the Covid-19 vaccine. To help keep our patients and team members safe, we are diligently working to reduce the risk of potential exposure to COVID-19 and other viruses and bacteria. These efforts include limits on the number of visitors.

Visitor Guidelines as of Thursday, December 30 2021

Inpatient/Outpatient Surgery: 2 adults may visit during your child's surgery.

Hospitalized Patients may have two designated visitors for the duration of their stay. They must be parents or caregivers. No siblings or others are allowed. Only one visitor may be at a patient's bedside at a time.

Admitted patients with a positive Covid-19 test and persons under investigation may have one designated visitor who is expected to stay at the bedside for the duration of the admission. This person must be a parent or caregiver.

Please do not

- visit other patients and/or their families in the hospital
- visit if you are sick or have a fever
- bring the patient's siblings or other children to the hospital

Please do wear your mask over your mouth and nose at all times (including inside patient rooms), except when sleeping.

To ensure that you have read and understand the visitation policy, please sign below:
