

Introduction to PowerChart for CHKDHS Community Physicians

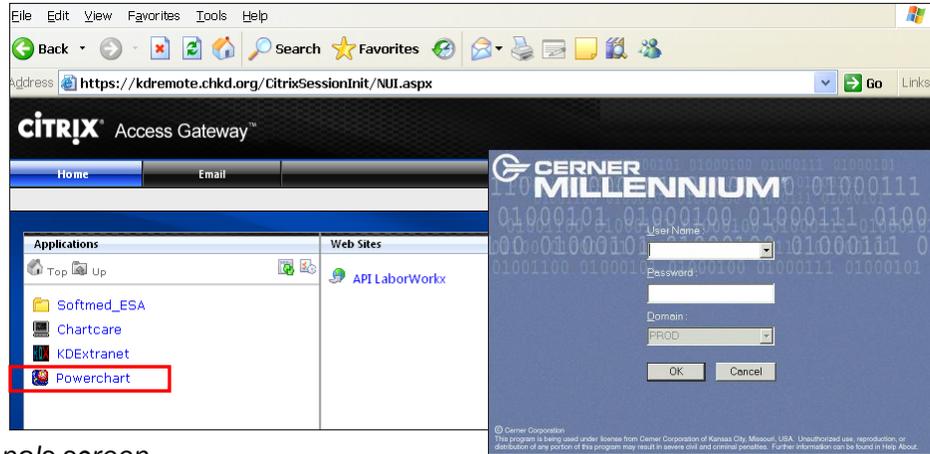

May 2010

CITRIX LOG ON

To log on to Citrix, complete the following steps:

1. Access the www.chkd.org website.
2. From the website, select *For Health Professionals*.
3. Select Physician Extranet from the *For Health Professionals* screen.
4. Enter your login information at the Citrix Access Gateway screen. After you have logged in to Citrix, all applications for which you have access will display.
5. Select PowerChart and log in using your username and password.

CONDUCTING A PATIENT SEARCH

As a community provider, you will have the ability to create patient lists that display patients based on specified parameters (i.e. patients that you have a relationship with). However, if the need arises, you can manually look up a patient and access the chart.

Keep in mind that when you access a patient's chart, you are establishing a relationship with the patient within the application. You will be listed in the Patient-Provider Relationship Summary.

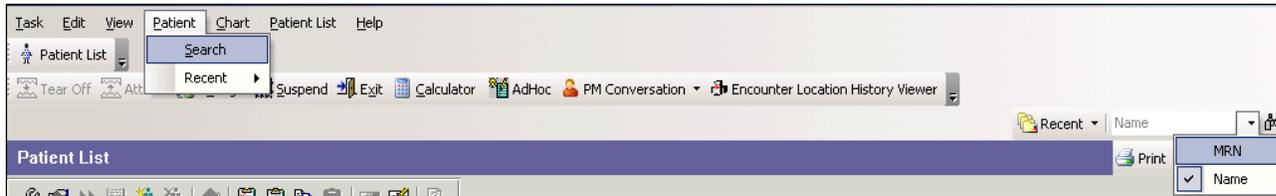

Therefore, please ensure that you are only selecting patients with whom you have a relationship.

Patient Demographics	Visit List	Problem List	Allergies	PPR Summary	Intellistrip

X	EICHELBERGER, MICHELLE D	Referring Physician	Inactive	12/08/2009	02/18/2010
X	Hamer, Kathy J (DBA)	Database Coordinator	Inactive	12/16/2009	02/18/2010

CONDUCTING A PATIENT SEARCH

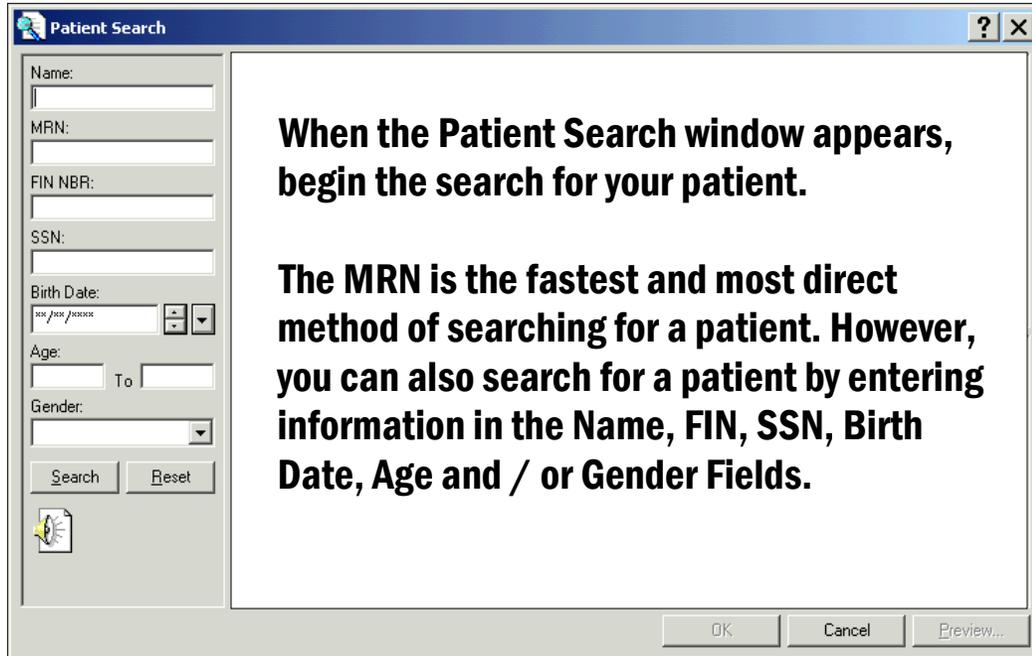

You can initiate a patient search by:

- Selecting Search from the Patient menu
- Clicking the search icon  within the Organizer

Both actions will cause the Patient Search Window to appear.

CONDUCTING A PATIENT SEARCH

When the Patient Search window appears, begin the search for your patient.

The MRN is the fastest and most direct method of searching for a patient. However, you can also search for a patient by entering information in the Name, FIN, SSN, Birth Date, Age and / or Gender Fields.

The screenshot shows a window titled "Patient Search" with the following fields and controls:

- Name:
- MRN:
- FIN NBR:
- SSN:
- Birth Date: (format: MM / DD / YYYY)
- Age: To
- Gender:
- Buttons: Search, Reset
- Buttons: OK, Cancel, Preview...

CONDUCTING A PATIENT SEARCH

After you conduct a patient search, all matching patients will display at the top of the screen. The selected patient's encounters will display at the bottom of the screen. Click the appropriate encounter and OK to open the chart.

The screenshot shows a 'Patient Search' window with the following fields and results:

Search Criteria:

- Name: zzt.pat
- MRN: [Empty]
- FIN NBR: [Empty]
- SSN: [Empty]
- Birth Date: [Empty]
- Age: [Empty] To [Empty]
- Gender: [Empty]

Search Results (Patient List):

Name	VIP	MRN	Gender	Birth Date	Age
ZZTEST, PATRECE	Employee Relative	00012119	Female	01/13/2008	2 Years
ZZTEST, PATRICK BRIAN		00012144	Male	01/16/1993	17 Years

Selected Patient Encounters:

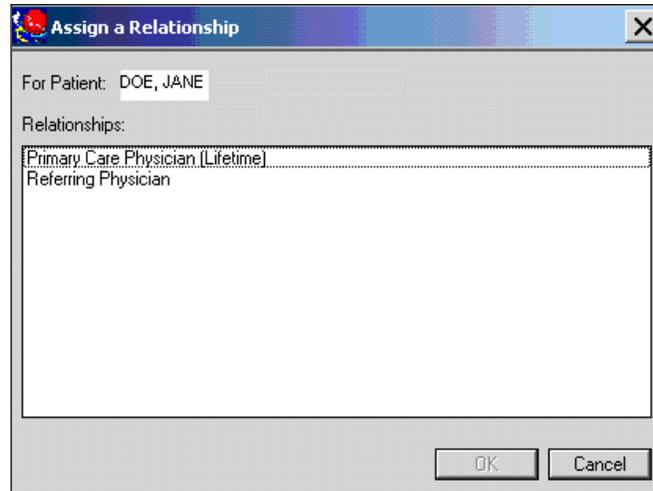

FIN NBR	Enc. Type	Med Service	Facility	Reg Date	Dis
000037501	Professional Services	Primary Care	CMG-Tidewater Children's Assoc	04/26/2010 09:43	04/
000510181	Recurring	Physical Therapy	CHKD	12/18/2009 11:30	03/
000211732	Inpatient	Gastrointestinal	CHKD	12/18/2009 11:23	

Buttons: Search, Reset, OK, Cancel, Preview...

CONDUCTING A PATIENT SEARCH

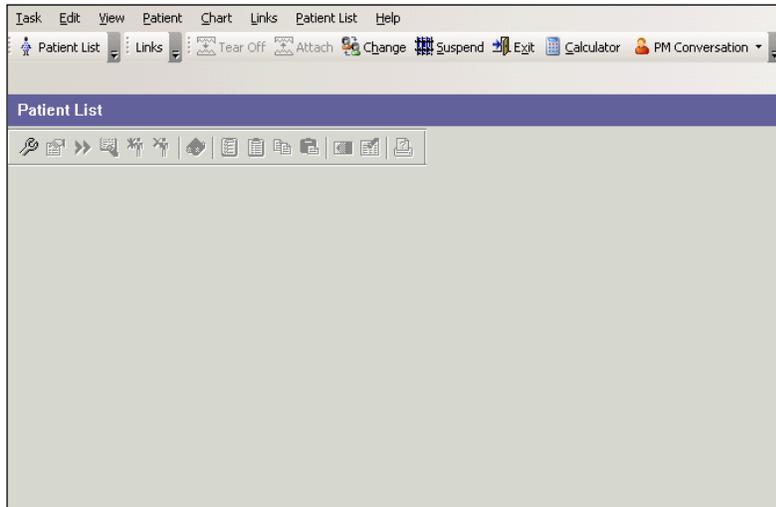

After you have selected the chart to open, you will be prompted to establish a relationship with the patient if you do not have one. Your selection options are Referring Physician and PCP. Choose the correct option and click OK.

REMEMBER: When you access a patient's chart, you are establishing a relationship with the patient within the application. Your name will be listed in the Patient-Provider Relationship Summary in PowerChart.

CREATING PATIENT LISTS

After you have gained access to PowerChart, your Organizer screen will appear. Until you set up a Patient List, this screen will appear blank.

A Patient List is a listing of all patients that meet certain criteria. For example, you can create a Patient List to show all patients with whom you have a relationship. There are three types of Patient Lists that you can create: Provider Group List, Relationship List, and Query List.

As a Community Provider, you will open a patient's chart directly from the Patient List.

CREATING PATIENT LISTS

A **Provider Group List** displays all patients based on the group that the Community Physician belongs to (i.e. Chesapeake Pediatrics).

To create a Provider Group List, complete the following steps:

1. Select the List Maintenance icon from the toolbar.
2. Indicate the type of List that you are creating in the Patient List type window.
After selecting the Provider Group List type, the Provider Group Patient List screen will appear.
3. Choose the applicable Provider Group for your practice by putting a check mark in the box.
4. Change the name of your list based on your preferences.
5. You can add admission and discharge criteria to your patient list by selecting the applicable option. For example, selecting a Discharged Criteria value of *All Patients Not Discharged* will show only in-house patients.
6. When complete, click Finish.

CREATING PATIENT LISTS

A **Relationship List** displays all patients for which you have a relationship (i.e. Attending Physician, Primary Care Physician). This list type populates based on how the patient was registered in the CHKDHS patient registration application.

To create a Relationship List, complete the following steps:

1. Select the List Maintenance icon from the toolbar.
2. Indicate the Relationship List that you are creating in the Patient List type window. After selecting the Relationship Patient List type, the Relationship Patient List screen will appear.
3. Expand the Visit Relationship box and choose All Visit Relationships.
4. Expand the Lifetime Relationship box and choose All Lifetime Relationships.
5. A Name will default for the list. Change the name based on your preferences. Click Next.
6. You can add admission and discharge criteria to your patient list by selecting the applicable option.
7. When complete, click Finish.

CREATING PATIENT LISTS

A **Query List** displays all patients based on the group that the Community Physician belongs to (i.e. Chesapeake Pediatrics). This list displays similar information as the **Provider Group List**. However, the list generates much faster because of the method that the system uses to access the information. The Query List is programmed to display patients that have a current **active** encounter type of Inpatient, Emergency, Outpatient in Bed, Observation, Surgical Day Care (SDC) or Day Surgery. This list is **not** updated automatically. You must use the execute button on the Patient List toolbar to update the list.

To create a Query List, complete the following steps:

1. Select the List Maintenance icon from the toolbar.
2. Indicate the Query List type in the Patient List type window. After selecting the Query List patient type, the Query Based Patient List screen will appear.
3. The only selection option available will be Provider Group List. Click it.
4. A Name will default for the list. Change the name based on your preferences

5. Make sure that the execute query option remains checked. Click Next.
6. On the Providers screen, expand the Provider Groups folder to display your practice.
7. Then, put a checkmark in the box next to your practice.
8. Select Next.
9. Once your practice is selected, the individual practice providers will display. You can select your name from the list by putting a checkmark in the box. However, patients for all providers in the group will display even if only one provider is selected.
10. When complete, click Finish.

The Query List will generate and display the date and time that it was last executed. The execute button will re-generate the query.

Patient List			
Provider Group List - NNP		Provider Group List-CHP	
Char's Special Patients			
This list was last executed 24 March 2010 10:33 EDT.			
Name	VIP Code	Location	Medical Service
ZZTEST, PATRECE	★	PI-POD A 0380 A	ENT
ZZTEST, PATRICK BRIAN		PI-POD B 0315 A	Gastrointestinal
ZZTEST, VERONDA HAPPINESS	★	PI-POD A 0380 B	Bleeding Disorders
ZZTEST, ANGELINA JOLIE		PI-POD A 0302 A	Gastrointestinal

The refresh button will update statuses of the patients on the displayed list and will display room assignment changes, new results or length of stay.

VIEWING PATIENT INFORMATION

After you have set up your Patient List, viewing the Patient Chart is as simple as double clicking on the name.

Name	VIP Code	Location	Medical Service	Admitted	Attending Physician	MRN	FIN	DOB	Age
ZZTEST, PATRECE	★	PI-POD A 0380 A	ENT	12/08/2009 14:18		00012119	000211698	01/13/2008	2 years
ZZTEST, PATRICK BRIAN		PI-POD B 0315 A	Gastrointestinal	12/18/2009 11:23		00012144	000211732	01/16/1993	17 years
ZZTEST, VERONDA HAPPINESS	★	PI-POD A 0380 B	Bleeding Disorders	12/15/2009 11:10		00012126	000211711	01/13/2009	14 months
ZZTEST, ANGELINA JOLIE		PI-POD A 0302 A	Gastrointestinal	12/28/2009 8:24		00012158	000211744	02/12/2005	5 years

The patient's chart will open, displaying tabs for which you have access.

The screenshot shows a software interface for viewing patient information. At the top, there is a menu bar with options like Task, Edit, View, Patient, Chart, Links, Notifications, Options, Current, Add, and Help. Below the menu bar, there is a toolbar with icons for Patient List, Links, Tear Off, Attach, Change, Suspend, Charges, Exit, Calculator, AdHoc, PM Conversation, and Explorer Menu. The main area displays patient information for 'ZZTEST, TEST PHARMNET'. The patient's age is 13 years, sex is Male, and DOB is 01/10/1997. There are also fields for Loc: 3B: 0031, Fin#: 000000523, and Inpatient status: 05/30/2008. A 'Menu' is open on the left side, listing various tabs: Orders, Chart Summary, Patient Information, Recent Results, Lab, Radiology, Summary Document, All Documents, Task List, Form Browser, and Overview. The 'Patient Information' tab is currently selected. The main content area shows a list of orders with columns for Order Name, Status, and Details. The first order is 'MRI Abdomen w/o IV Contrast' with a status of 'Canceled' and details including start date/time, priority, and urgency. The second order is 'MRI Ankle Lt w/ IV Contrast' with a status of 'Canceled' and similar details.

ORDERS TAB

The Orders tab provides a view of the patient's existing orders. From this tab, you have the ability to filter the view of existing order categories. You can also select a past visit to view orders entered during a specific visit encounter.

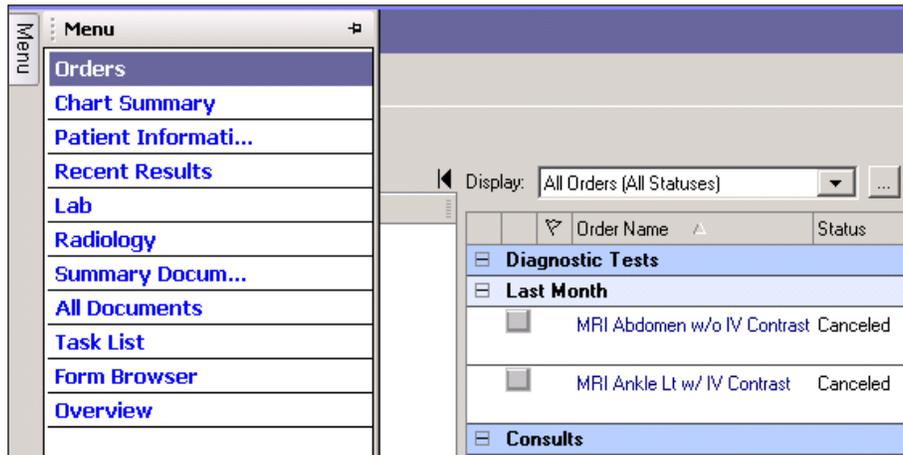

CHART SUMMARY TAB

The **Chart Summary** tab provides a “snapshot” of the selected patient’s chart displaying listed Problems, Ht, Wt, Reason for Visit, Allergy, Isolation, Critical labs and Continuous Infusions.

The screenshot displays the following information:

- Menu:** Orders, Chart Summary (selected), Patient Informat..., Recent Results, Lab, Radiology, Summary Docum..., All Documents, Form Browser, Overview
- Patient Information:** THOMAS, CANDY SUE, Age: 4 years, Sex: Female, Loc: 8C-POD B; 0823; A, Allergies Not, DOB: 01/28/2005, EMR: 00012129, Fin#: 000211712, Inpatient [12/15/]
- Problems/Diagnoses:** Table with columns Description and Status/Type.
- Anticipated Discharge Date --**
- Reason for Visit --** HEART VALVE PROLAPSE - 12/15/09 16:40
- Advance Directive --**
- Code Status --**
- Allergies --**
- Diet Orders --** Diet Change-[Start Date/Time] 12/31/09 13:24:00, [Diet Order] Milk Free; New Admission (Nutrition)-[Start Date/Time] 12/31/09 13:24:00, [Diet Order] Toddler
- Blood Type --**
- Fall Risk Score --**
- Skin Integrity Risk Score --**
- Pain:** Location - Intensity - Acceptable --; Pain Score --
- Isolation Precautions --**
- Critical Labs [1 Day]** Table with columns Lab, Result, Date/Time
- Continuous Infusions** Table with columns Orderable, Status, Order Details

PATIENT INFORMATION TAB

The **Patient Information** tab displays high-level data about the patient relative to demographic information and additional patient identifiers such as medical record or social security numbers. This tab has sub-tabs that display additional information.

LAB TAB

The **LAB TAB** provides a flowsheet view of the patient's results; you can filter by available categories and view information in a group, table or list format.

The screenshot displays a medical software interface. At the top, a yellow header bar contains the patient name "ZZTEST, TEST PHARMNET" and demographic information: "Age:13 years" and "DOB:01/10/1997". Below the header is a "Menu" panel with a list of options: "Orders", "Chart Summary", "Patient Informati...", "Recent Results", "Lab" (highlighted), "Radiology", "Summary Docum...", "All Documents", "Form Browser", and "Overview". To the right of the menu is a "Lab" tab area with icons for a bar chart, a microscope, and a person. Below these icons is a "Flowsheet:" dropdown menu set to "Lab View". A "Navigator" panel is visible below the flowsheet, with a list of items: "Hemogr", "Manual", "Slide Rev", and "Other Hema", each with a checked checkbox. Overlaid on the right side of the interface is a "Result Legend" dialog box. This dialog box has two columns: "Colors" and "Indicators". The "Colors" column includes: a red square for "Critical", a red square for "Positive", a blue square for "High", a blue square for "Low", a white square for "Abnormal", and a black square for "Default". The "Indicators" column includes: "C Critical", "C Positive", "H High", "L Low", "* Abnormal", "c Corrected", "! Comment (high importance)", "* Comment (medium importance)", and "· Comment (low importance)". A "Close" button is located at the bottom right of the dialog box.

RADIOLOGY TAB

The RADIOLOGY TAB provides result information you can filter by available categories using the navigator view or information in a group, table or list format.

OVERVIEW TAB

The **Overview** tab provides a listing of all encounters, medications, procedure, documents, orders, and results for the selected patient. This tab can be date and time stamped to indicate the last time the user reviews the information. Once time-stamped, the data will be cleared.

The Date / Time Stamp button that appears on the Overview Tab appears in the left-hand corner. Once time-stamped, only results after the last Date / Time Stamp will appear.

Afterwards, only **new** information that has been entered since the Date / Time stamp will appear in the Overview Tab.

LOGGING OUT

To prevent others from using your electronic signature, you must sign off the system once you have completed the use of the system.

There are three methods that can be used to log out:

- Click on the Exit icon. 
- Click on the “X” in the upper right-hand corner of the screen. 
- Click on the Task Menu and select Exit.
